SUMMARY

AI/ML and Generative AI-focused Computer Science student with hands-on experience building data-driven and AI-powered applications using Python, Machine Learning, NLP, LLMs, RAG, LangChain, LangGraph, Streamlit, SQL, and SQLite. Experienced in developing ETL pipelines, data analytics platforms, NLP-based applications, and LLM-powered solutions. Familiar with AWS, Docker, REST APIs, and CI/CD.

TECHNICAL SKILLS

Programming: Python, SQL, Java

Machine Learning: Machine Learning, Deep Learning, NLP, Scikit-learn, TensorFlow, Keras

Generative AI: Generative AI, LLMs, RAG, LangChain, LangGraph

Data & Analytics: Pandas, NumPy, SQL, SQLite, SQLAlchemy, Data Analysis, ETL, Data Validation

Visualization: Power BI, Streamlit, Plotly, Matplotlib

Cloud & MLOps: AWS Bedrock, Amazon SageMaker, Amazon EC2, AWS Lambda, Docker, DVC, CI/CD

Development: Flask, Gradio, REST APIs

Tools: Git, GitHub

EXPERIENCE

Data Analyst Intern | Bluestock Fintech *May 2026 – July 2026*

- Developed the N100 Financial Intelligence Platform, building ETL pipelines to process and validate financial data from 12+ datasets using Python, Pandas, SQLAlchemy, and SQLite.
- Implemented a Financial Ratio Engine to automate calculations across profitability, liquidity, leverage, valuation, and cash flow metrics for company analysis. Designed interactive financial analytics dashboards using Streamlit, Plotly, and Power BI for data visualization and company analysis
- Collaborated with cross-functional teams to develop scalable, data-driven financial analytics solutions.

PROJECTS

AI Coding Assistant | *LangGraph, LangChain, Groq API, OpenAI GPT-OSS-120B, Streamlit, SQLite*

- Built a multi-programming-language AI coding assistant for code generation, debugging assistance, programming explanations, and contextual conversational support. Integrated OpenAI GPT-OSS-120B through the Groq API to power LLM-based coding assistance and natural-language interactions.
- Designed the application workflow using LangGraph and LangChain to structure LLM interactions and manage conversational state. Implemented SQLite-based persistent conversation storage, enabling users to retain and access chat history across sessions
- Developed an interactive Streamlit UI and deployed the application on Streamlit Community Cloud.

N100 Financial Intelligence Platform | *Python, Pandas, NumPy, SQL, SQLite, SQLAlchemy, Streamlit, Plotly, Power BI*

- Engineered an end-to-end financial intelligence platform for analyzing listed companies using multi-source financial datasets.
- Developed automated ETL and data validation pipelines to maintain data quality across financial statements, market data, and ratio datasets. Implemented a financial ratio engine covering valuation, profitability, liquidity, leverage, and cash flow metrics.
- Built interactive dashboards for company profiling, financial performance analysis, and peer benchmarking.

ATS Resume Analyzer | *Python, NLP, Gemini API, Streamlit*

- Built an AI-powered ATS Resume Analyzer that compares resumes against job descriptions and generates ATS compatibility scores. Implemented resume parsing, keyword extraction, and semantic similarity analysis using NLP techniques
- Deployed the application using Streamlit Cloud.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | OP Jindal University *2023 – Present*

CGPA: 8.52/10

Class XII | Chinmaya Vidyalaya *2020 – 2022*

Percentage: 69.4%

LANGUAGES

English | Hindi
